

Plastic Plugs with Chain Fig. 07-281A

Specifications

Materials:

Injection molded ABS

Chain:

Zinc Plated Steel

Sizes:

3" NST

2 1/2" NST

1 1/2" NST

Color

Black

Red

Inscription:

Do Not Pressurize

*Patent Pending

Description

FPPI Plastic Plugs are designed as an alternative to brass or bronze plugs for the protection of female threads from damage. Manufactured from ABS, our plugs provide superior performance to other materials available. In addition to their clean appearance, ABS plastic plugs will not oxidize and resist breakage due to impact. Use of FPPI Plastic Plugs also reduce system service costs related to theft of brass or bronze components. Not suitable as a test plug*.

Installation

INTENDED ONLY FOR USE WITH NST THREADS. Installation of the FPPI Plastic Plug is relatively simple. After removing the plug from its' packaging, simply thread the plug into the female swivel or thread hand tight. Insert the open hook on the unattached end of the provided chain through the chain tab provided on most hose valves and re department connections. Attachment of the chain provides a method of keeping the plug attached to the valve or FDC while the apparatus is in service. Restore the plug after service to protect the female thread from damage.

CAUTION: PLASTIC PLUGS ARE FOR PROTECTION OF THE THREADED FEMALE THREAD ONLY. DO NOT PRESSURIZE PLASTIC PLUGS. SERIOUS BODILY INJURY CAN OCCUR.

*Do not use to contain pressure or for system testing. Failure of the plastic plug due to pressurization may cause bodily injury or damage to surrounding equipment and structures.
