

Anti-Vibration Safety Washer For Mechanical and Industrial Applications

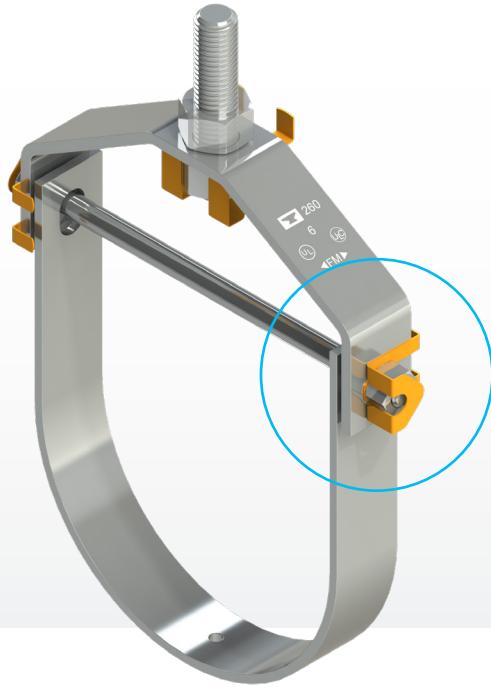

Fig. 260SW

Patent: 2021-0080032

About the Product

Description

ASC Engineered Solutions™ Anvil® brand figure 260SW anti-vibration safety washer is an economical, first of its kind engineered solution to prevent vibration-caused failure of clevis hanger threaded components. Figure 260SW installs quickly and easily in new construction or retrofit safety projects. This product is ideal for use in vibration-heavy environments such as manufacturing plants, distribution centers, parking structures, bridges, tunnels and stadiums.

Figure 260SW is available in various sizes to accommodate the hardware on all sizes of Anvil figure 260 clevis hangers. It has a bright “safety orange” color to help ensure visual verification from the ground that they are installed in place.

The 260SW safety washer is installed on the cross-bolt and hanger rod hardware of the hanger to prevent failure of the hanger due to loosening or complete unfastening over time due to structural vibrations.

For more information about Anvil figure 260SW anti-vibration safety washer, contact your local ASC Engineered Solutions sales representative.

Features & Benefits

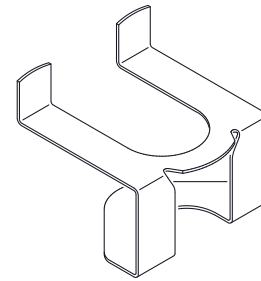

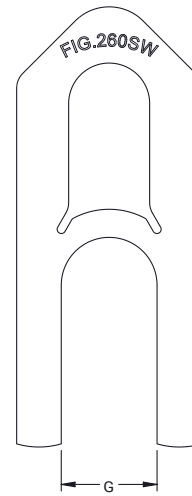

- Comes in ¾" – 1" (fits ½" through 30" Fig. 260 Clevis Hangers, 1" size will fit both 1" and 1 ¼" rod diameter)
- Aluminum construction for easy installation by bending by hand to lock in place
- Safety Orange Color for easy visibility and inspection from the ground
- Easy to remove and replace for system maintenance
- Can be used with clevis hangers with insulation shields, pre-insulated inserts, felt lining or plastic coating
