## Disc/Stem

316 Stainless Steel, 17-4 Stainless Steel, and 17-4 Stainless Steel / Elastomer Covered Disc

## **Resilient Seat**

EPDM, Buna-N, Viton, Natural Rubber, White Buna, White Neoprene

Stem Bushing Teflon<sup>®</sup> – Graphite Impregnated

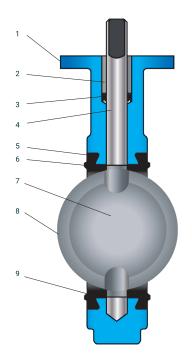

Stem Packing Buna-N and Viton

Additional materials are available for a wide selection of applications.

## **Features and Benefits**

- 1. Bodies are machined to high tolerances. 6. Stem and body are isolated from line Guaranteed standard dimensions for interchangeability of parts and operators
- 2. Top bushings protects the stem from side thrust of operators. They are made of impact and corrosion resistant materials
- 3. Special double V-shape of stem seal self-adjusts to protect the stem area for either vacuum or pressure use
- 4. Two-piece body and one-piece disc/ stem makes field replacement of seat and disc/stem quick and easy
- 5. The special snap-in Resil-O-Seat<sup>™</sup> design secures seat in place without bonding. The Resil-O-Seat™ is 100% field replaceable - no special tools required. All standard seats are Food Grade with the exception of Viton

- media by the interference fit of the primary seal created between the disc and seat
- 7. Specially designed disc/stem prevents distortion of disc under high pressure. Thin disc allows for maximum open flow
- 8. Disc edge is individually processed through machining for a smooth edge, providing a bubble tight shut-off and maximum seat life
- 9. Resil-O-Seat<sup>™</sup> forms a seal against all standard ANSI 125/150 flanges. Gasketing requirements are eliminated
