Building Connections That Last™

ASC Engineered Solutions

Series 396 / 397

2"– 72" Resilient Seated Butterfly Valves Datasheet

Series 396
Wafer style

Series 397
Lugged style

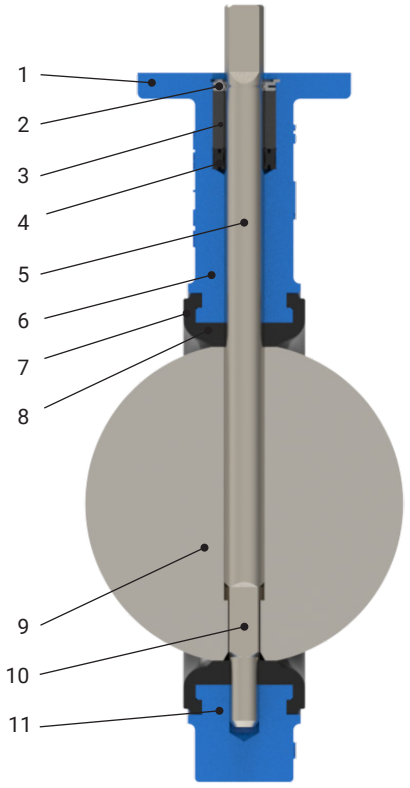
ABZ VALVE
An ASC Engineered Solution

2"– 72" Resilient Seated Butterfly Valves
Series 396 / 397

Advantages

- Standard one-piece series 396 (wafer) and series 397 (lugged) butterfly valves are suitable for bi-directional service at the full pressure rating of the valve.
- Standard lugged style valves (series 397) are suitable for bi-directional dead-end service at the full pressure rating of the valve

1. High-precision machined bodies ensure component & operator interchangeability, and consistent valve performance.
2. Snap rings and washers retain (blow-out proof) the stem, bushing, and packing (2" to 24").
3. Top bushing, made from corrosion resistant materials, absorbs side loads from actuators and operators.
4. Self-adjusting, double V-shape stem packing protects the stem area.
5. Stems are machined to standard dimensions for interchangeability. 2" to 12" valves have one-piece stems, and 14" to 72" valves have two-piece stems.
6. Extended body necks allow for pipe insulation (2"-12").
7. Valve seats have been designed to be the seal between the valve and standard ASME 125/150 flanges. Flange gaskets are not used during installation.
8. 14" to 24" valve seats are injection molded directly to the body. All other sizes have booted (dovetail) seats that are bonded to the body during assembly.
9. Disc edge is machined and buffed to provide bubble-tight shut-off, lower torque, and longer seat life.
10. Stem design internally drives the disc. The design does not require pins or fasteners and eliminates potential points of failure.
11. Body and stem are fully isolated from the pipeline line media by the primary seal, which is the interference fit between the seat & disc.



Specifications

Design: API 609 Category A, MSS SP67

Testing: API 598, ISO 5208

Standard Construction

Body
Ductile Iron with Aliphatic Acrylic Polyurethane coating (epoxy primer)

Disc
316 Stainless Steel, Aluminum Bronze, Nylon 11 Coated Ductile Iron, Nickel Plated Ductile Iron

Stem
416 Stainless Steel, 316 Stainless Steel

Resilient Seat
EPDM, Buna-N, Viton

Stem Bushing
Teflon® – Graphite Impregnated

Stem Packing
Buna-N

Additional materials are available for a wide selection of applications.

Pressure Rating

	Bi-directional	Bi-Directional Dead-End Service (Lug Style, Series 397)
2"- 6"	250 PSI (416 SS stem) 200 PSI (316 SS stem)	250 PSI (416 SS stem) 200 PSI (316 SS stem)
8"-12"	200 PSI (250 PSI with option HP)	200 PSI (250 PSI with option HP)
14" & larger	150 PSI	150 PSI

The torque data above (lbf–in) includes a 20% Safety Factor.

Undercut discs (with lower torque & reduced pressure rating) are available as special order.

Torque of Viton seated valves = EPDM torque shown above x 1.20

Severe Conditions:

- Media with solvents, alcohols, or detergents that remove amides, or
- Degreasing, abrasive, or dry (gases, powders, etc) applications, or
- Pipeline media that coats internal valve components with substantial deposits, or
- Infrequently operated valves (i.e. once a year)

2"– 72" Resilient Seated Butterfly Valves

C_V values represent U.S. gallons per minute of 60°F water through a 100% open valve at a pressure drop of 1 psi.
Recommended control angles are between 20°–75° open (22% to 83% open).

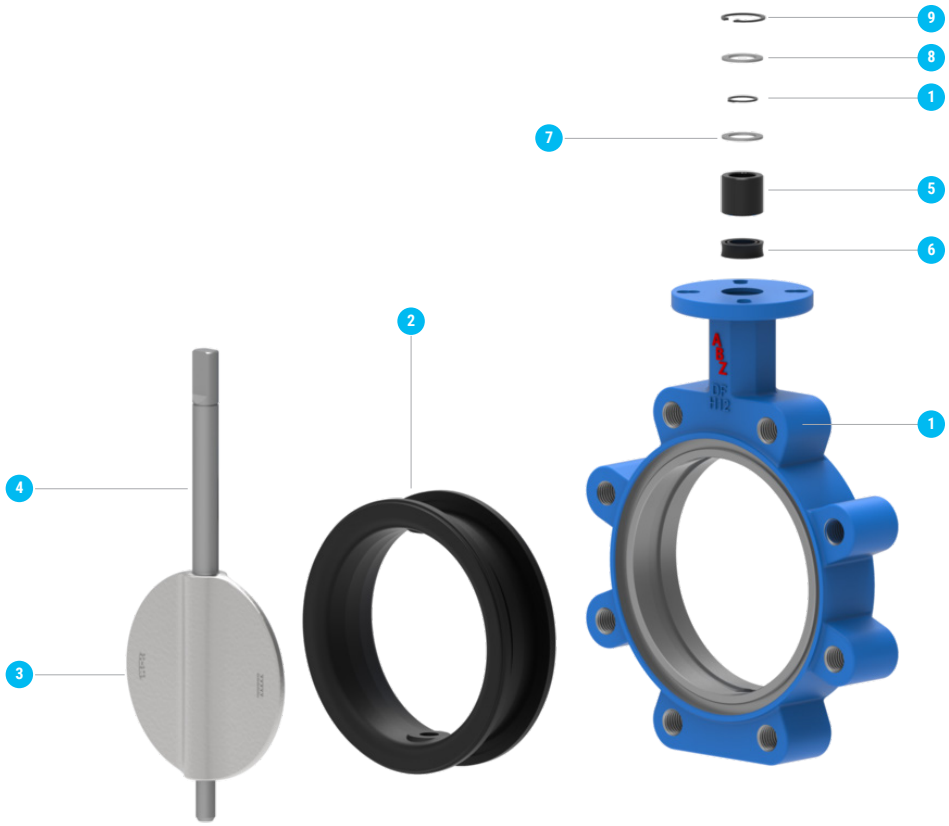
Notes

1. Design in accordance with API 609 Category A and MSS SP67.
2. Valves cannot be installed in pipe or with flanges that have an inside diameter less than the "E" dimension.
3. 2"–24" Flange Connection: ASME B16.1 Class 125 & ASME B16.5 Class 150.
4. 26" & larger Flange Connection: ASME B16.1 Class 125



2"–12" Parts List and Standard Materials

No.	Part Name	QTY	Material
1	Body	1	Ductile Iron (DI)
2	Seat	1	EPDM, Buna-N*, or Viton*
3	Disc	1	316SS, DI+ENP, DI+Nylon, or C95400 (AL-Bronze)
4	Stem	1	416SS, or 316SS
5	Bushing	1	PTFE + Graphite
6	V-packing	1	Buna-N*
7	Gasket	2	Carbon Steel
8	Stem Retaining Ring	1	Carbon Steel
9	Body Retaining Ring	1	Carbon Steel

*Nitrile rubber, also known as nitrile butadiene rubber, NBR, Buna–N, or acrylonitrile butadiene rubber.
Viton a brand of Chemours, also known as FKM, fluorine rubber, or fluoro–rubber.

14"– 28" Resilient Seated Butterfly Valves
Series 396 / 397
