

Reduce Installation Time and Lower Costs with SCI® Press Fittings

Huge selection of SKUs. Quality you expect of ASC.

ASC Engineered Solutions® offers a complete Press Fittings solution. Our SCI branded press product line includes a comprehensive range of Carbon Steel, Copper, and Stainless Steel press fittings to meet all your application needs.

Designed for Plumbing, Mechanical & Light Industrial applications, our Press solutions deliver reliability, efficiency, and versatility for a wide range of applications. Each fitting is marked with a color-coded insertion depth marking that ensures confidence and indicates the sealing element material: EPDM - Green, HNBR - Yellow, and FKM - White.

With over 900 SKU's, the SCI press product line offers an extensive range of fitting and coupling styles to optimize design and installation efficiency. This wide selection enables you to use a single, dedicated solutions provider for all your press fittings needs.

Installation is simple, fast, and can be done using the standard press tools and jaws you have today. Full installation instructions are provided on the product's packaging and on the submittal.
