

Gruvlok® SlideFLEX Ready-for-Installation Coupling for Mechanical and Mining Systems

About the Product

The Gruvlok SlideFLEX figure 70 coupling is a lightweight, high-performance, ready-for-installation coupling. Its slide action design eases assembly and reduces installation time.

SlideFLEX Fig 70 also features a patented gasket that provides four separate sealing surfaces for added protection.

The SlideFLEX coupling is designed to be used with roll groove or cut groove steel pipe, as well as Gruvlok grooved-end fittings, and valves.

Fig 70 SlideFLEX coupling allows for pressures between full vacuum and up to 1000 psi on roll or cut grooved carbon steel standard wall pipe, making it very well suited for use in mining applications. It provides flexible connection, allowing linear and angular deflection, and standard pipe hanging practices per B31 Pipe Codes.

Features & Benefits

- Fast & low-cost installation
- Flexible design
- Accommodates linear & angular deflection
- Meets requirements of most HVAC & mining applications, also can be specified
- Lightweight
- Performance rated up to 1000 psi
