

SCI® Copper Press Fittings for Plumbing and Mechanical Applications

About the Product

ASC Engineered Solutions™ offers a complete line of copper press fittings for commercial and residential plumbing and mechanical applications. The SCI Press product line features a full range of couplings, elbows, tees, reducers, caps, adapters, unions, and crossovers, providing reliable and economical pipe connections for copper systems. This is one of the widest press product offerings in the industry, with over 300 individual SKUs.

These products meet industry regulations for press fittings, including NSF 61, IAPMO and ASME standards. They are intended for use with ASTM B88, Types K, L, and M hard copper tubing in sizes ½" to 4" and soft copper tubing in sizes ½" to 1 ¼".

Installation is simple and can be done using standard press tools and jaws. The fittings feature exterior green lines that mark the proper pipe insertion depth. Full instructions for installation are provided on the product's packaging and on the submittal.

SCI Copper Press is available nationwide through ASC's many local distribution centers and suppliers.
